INTRODUCTION

Road Safety Awareness Month is a dedicated period aimed at promoting safe driving practices, reducing road accidents, and educating the public on the importance of following traffic rules. This initiative, observed in many countries, brings together government agencies, law enforcement, NGOs, and the general public to raise awareness about road safety measures.

The campaign includes various activities such as awareness drives, seminars, workshops, and enforcement of traffic laws to ensure safer roads for all. It emphasizes critical aspects like wearing seat belts, avoiding drunk driving, following speed limits, pedestrian safety, and the use of helmets for two-wheeler riders.

With increasing cases of road accidents worldwide, Road Safety Awareness Month serves as a crucial reminder for individuals to be responsible and vigilant on the roads. By adhering to traffic regulations and promoting safer behaviours, we can work towards reducing accidents and saving lives.

INTRODUCTION :

International Women's Day (IWD) is celebrated annually on March 8 to recognize the achievements of women across social, economic, cultural, and political spheres. It also serves as a reminder that International Women's Day is more than just a celebration—it's a movement for change. Individuals and organizations contribute to a fairer, more inclusive world for all by participating in events, raising awareness, and taking action.

International Women's Day is not just a celebration but a global movement advocating for gender equality and women's empowerment. It serves as a reminder of the progress made in women's rights while highlighting the challenges that still exist, such as gender discrimination, pay gaps, and violence against women.

Through events, awareness campaigns, and policy discussions, IWD encourages individuals, organizations, and governments to take action toward creating a more inclusive and equitable society. It inspires both women and men to support gender parity in workplaces, education, and leadership. call to action for gender equality and women's rights worldwide.

Introduction on World TB Day

1 World TB Day is observed every year on **March 24th** to raise public awareness about **tuberculosis (TB)** and the efforts being made to eliminate this deadly disease. The

2 **Dr. Robert Koch** announced his discovery of the bacterium *Mycobacterium tuberculosis*, which causes TB — a ground-breaking moment in medical history.

1. Despite being preventable and curable, TB remains one of the world's top infectious killers, particularly affecting vulnerable populations in low- and middle-income countries. World TB Day serves as a platform to highlight the challenges in TB prevention and control, advocate for stronger global and local action, and promote research and investment towards ending TB.

2. Each year, World TB Day has a specific theme that reflects current priorities in the fight against TB, reminding the world that **"Yes! We can end TB."** Through awareness, education, and collaboration, we can make progress toward a TB-free world.

World TB Day serves as a powerful reminder that **tuberculosis is still a serious global health threat**, but also one that we have the tools and knowledge to overcome. Through awareness campaigns, community engagement, and strong government initiatives, we can work together to reduce the spread of TB and support those affected.

The events and activities held in observance of this day help to **educate, inspire, and mobilize action** at every level — from individuals to international organizations. It is only through **collective effort, continuous education, and compassion** that we can achieve the goal of a TB-free world.

POSHAN PAKHWADA-2025

[DATE-23rd April,2025 Location- Computer lab(ii), old building of Govt. college Sundargarh], Chief Guest- Dr. Swati Patel, Nutritionist, District Head Quarter Hospital, Sundargarh.

INTRODUCTION OF POSHAN PAKHWADA PROGRAM:

Nutrition plays a fundamental role in human health, influencing physical growth, mental development, immunity, and overall well-being. Malnutrition, whether due to deficiency or excess, can lead to a wide range of health problems, including stunted growth in children, weakened immunity, chronic diseases, and reduced productivity. Recognizing this critical link between nutrition and health, the Government of India launched the **Poshan Abhiyaan** in 2018, with the goal of improving

nutritional outcomes for children, pregnant women, lactating mothers, and adolescents.

As part of this mission, **Poshan Pakhwada**—a fortnight-long nutrition awareness campaign—is observed annually in March. This initiative focuses on mobilizing communities to spread awareness about good nutrition practices, promote the use of traditional and locally available nutritious foods, and encourage behaviour change to address issues like anaemia, undernutrition, and poor dietary diversity. Through a coordinated effort involving Anganwadi workers, health professionals, and local governance bodies, Poshan Pakhwada aims to build a nutritionally empowered India.

OBJECTIVES OF POSHAN PAKHWADA

1. Promote Nutritional Awareness
To raise awareness among communities about the importance of nutrition, healthy eating habits, and the impact of malnutrition on overall health and development.
2. Encourage Community Participation
To mobilize community support and engagement in improving nutrition outcomes through locally driven initiatives and grassroots involvement.
3. Highlight Government Schemes and Services
To educate people about existing government nutrition-related schemes like ICDS (Integrated Child Development Services), Mid-Day Meal, and Poshan Tracker, and encourage their utilization.
4. Strengthen Behavioural Change Communication (BCC)
To promote sustained behavioural changes related to diet, hygiene, breastfeeding, and childcare practices through focused campaigns and activities.
5. Promote Use of Local and Traditional Foods
To revive and encourage the consumption of locally available, traditional, and seasonal foods that are rich in nutrients and culturally relevant.
6. Focus on Critical Areas like Anaemia and Stunting
To address key nutritional challenges such as anaemia in women and children and stunting among children under five.
